### CREATIVE PROBLEM-SOLVING AND DECISION-MAKING

This entertaining approach to the important topic of creative problem solving provides participants with processes and tools for addressing unique and difficult problems. Exercises and instruction are oriented to moving students past familiar approaches into new paradigms of problem-solving. Participants will learn the various approaches to implementing effective decision-making and problem-solving within the organization. Both individual and group problem-solving/decision-making principles and processes will be presented and applied to organizational issues through interactive exercises.

Time format: ½ day
