## Team Challenges Workshops

### TRENDS THAT ARE CHANGING THE WORKPLACE AND OUR LIVES

Name one major aspect of our society that hasn't been significantly changed or transformed in the past 20 years! Clearly change isn't new. Whether it is the rise of China, the Global Economy, or the total transformation of families and childhood, our society is dramatically changing.

Dr. Bender is not a futurist. He is a trends junkie! With this hard-hitting, data-driven presentation, you will:

- See the trends that are changing our society
- Discuss the impacts on families, children, organizations, and you
- Identify strategies for meeting future challenges

Time format: ½ day or 1 day
